**(54) RESIN COMPOSITION  
FOR CROSSLINKED  
ANTIFOULING COATING**

(57) Abstract:

**PURPOSE:** To provide a non-pollutive resin composition suitable for antifouling coatings excellent in adhesivity to primer coatings and in the strength of coating films, and useful for crosslinked antifouling coatings.

**CONSTITUTION:** A resin composition for crosslinked antifouling coatings, characterized by reacting a silicone-polyester block copolymer resin with an aminoalkoxysilane in an amount of 0.5-3 times equivalents based on the equivalents of the non-reacted epoxy groups of the resin, the silicone-polyester block copolymer resin being produced by reacting (A) an epoxy group-containing silicone resin having a mol. wt. of 700-8000 with (B) a carboxyl group-containing polyester resin having a mol. wt. of 1500-2000.
